## Cold chain management with Wialon

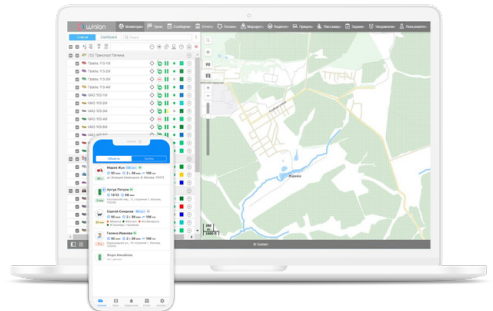

### What is Wialon?

It is an advanced telematics platform enabling cold chain monitoring and control.

Wialon is a #1 fleet management system in the world in terms of the connected vehicles. It is a perfect solution for remote temperature control of refrigerated transport delivering goods that require special conditions.

### With Wialon, fleet owners can:

- ✓ Provide safety and preserve quality of perishable or sensitive goods
- ✓ Prevent financial losses related to spoiled products
- ✓ Improve visibility of the transportation processes

# WIALON KEY FEATURES FOR COLD CHAIN MANAGEMENT

- ✓ **Real-time temperature and humidity monitoring** inside and outside refrigerator trucks as well as controlling their operation mode remotely
- ✓ **Door opening and closing detection** showing the time, location and duration of the event
- ✓ **Custom alerts** for drivers and dispatchers via email, SMS, and push notifications in terms of significant changes of temperature, humidity or other important parameters
- ✓ **Routing tool** helping to build efficient and cost-effective routes necessary for cold chain logistics
- ✓ **Hardware compatibility** with more than 2,900 device models including devices with additional temperature and humidity sensors
- ✓ **User-friendly analytics** with tables, graphs and charts for providing automatic reports to customers and analyzing transportation processes in different periods of time
